DETAILED ACTION

This communication is in response to the Applicants' response dated 10/30/06. Claims 1-32 are pending in the application. Claims 1 and 17 are independent claims.

Claim Rejections - 35 USC § 101

Regarding claims 1-16, these claims recite the method of generating an offset map and relationships to the backup images, but fails to recite a tangible result, a requirement for compliance with the provisions of 35 U.S.C. § 101 in view of the Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility, published on 26 October 2005, which can be found at http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/guidelines101_20051026.pdf, particularly with respect to ANNEX IV Computer-Related Nonstatutory Subject Matter, beginning on page 50.

For a result to be tangible, it must be more than just a thought or a computation; it must have real-world value rather than an abstract result. For instance, claim 1 merely cites 'writing the offset map to the backup image before writing the file data to the backup image' as the result.

Allowable Subject Matter

Claims 17-32 are allowed.
